

BALKAN METERING SOLUTIONS

BUSES AND VANS

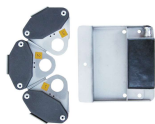

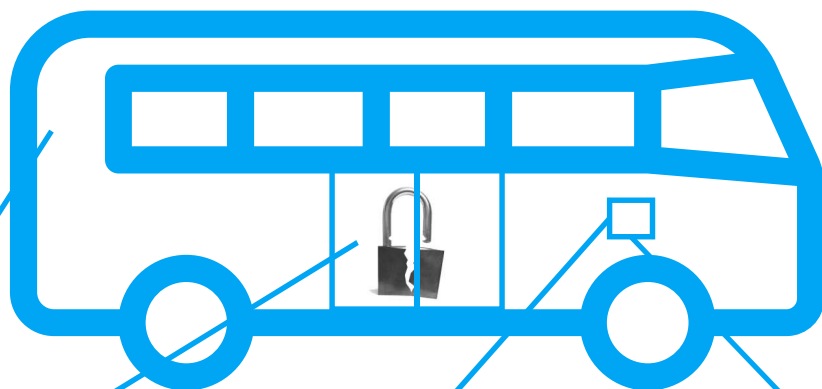

EQUIPMENT SURVEILLANCE

because

EVERY DROP COUNTS!

In collaboration with your GPS provider we can install enough equipment to protect the goods and your vehicle from illegal manipulation. Every project is dedicated to the current client and designed just for his purpose. In the warranty period there is a schedule of periodical examination which can lead to intense security and further training of your selected personal.

Doors and bottom covers:
Your GPS unit will have an information for the state of the doors and/or bottom cover (open or close)

Tank door flip:
RFID based door sensor that gives a signal to the GPS unit for its state

Reservoir tank:
RFID based fuel cap sensor that gives a signal to the GPS unit for its state

Tech info:

- Electro-pneumatic installation
- RFID technology
