

BALKAN METERING SOLUTIONS

TRAILERS

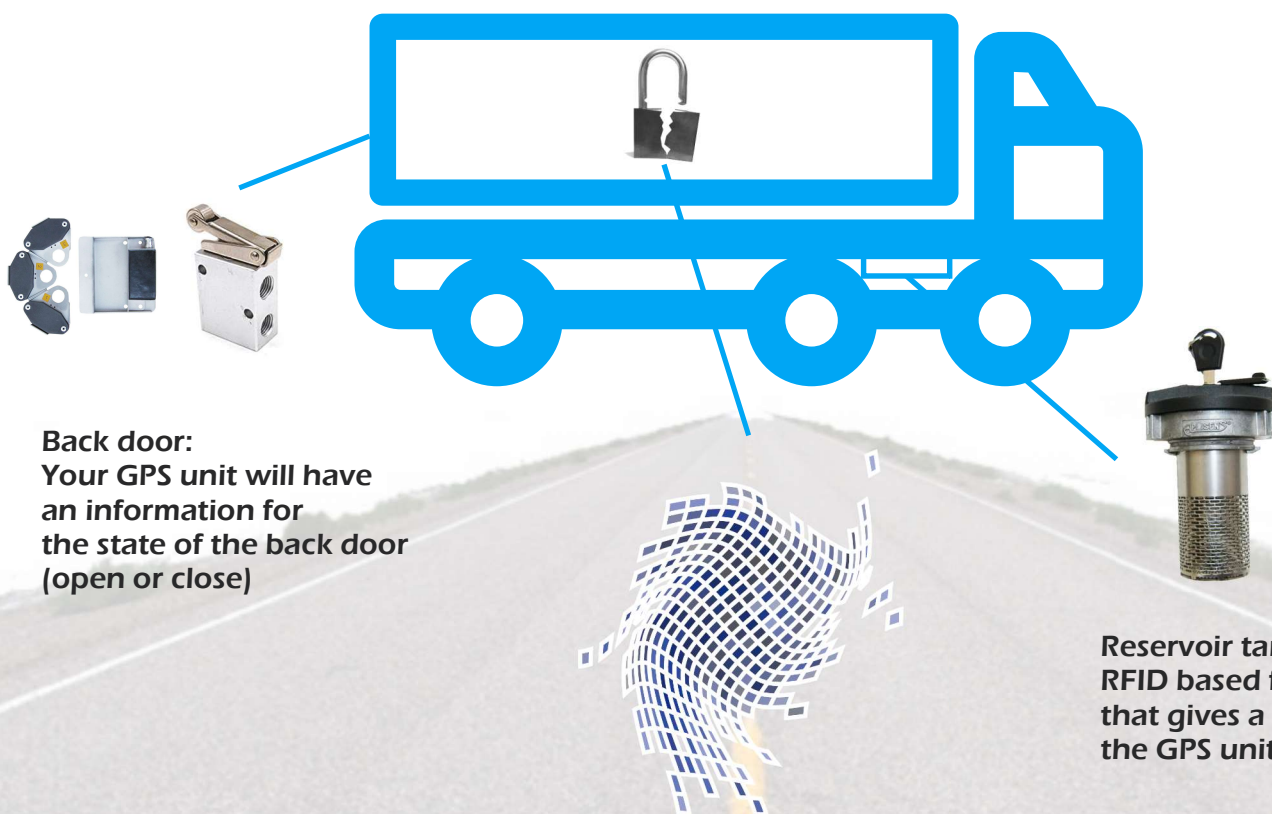

EQUIPMENT SURVEILLANCE

because

EVERY DROP COUNTS!

In collaboration with your GPS provider we can install enough equipment to protect the goods and your vehicle from illegal manipulation. Every project is dedicated to the current client and designed just for his purpose. In the warranty period there is a schedule of periodical examination which can lead to intense security and further training of your selected personal.

Back door:
Your GPS unit will have an information for the state of the back door (open or close)

Reservoir tank:
RFID based fuel cap sensor that gives a signal to the GPS unit for its state

Tarp:
Upgrade your own trailer tarp with the sensor device built by BMS and get a signal to the GPS unit or an alarm in the vehicle everytime the tarp is broken

Tech info:

- Electro-pneumatic installation
- RFID technology
- Connectable to any GPS unit
- Low maintenance
- Solutions can be made on-site

Commercial info:

- Warranty of 1 year
- Short delivery time
- Quick installation
- Periodical examination by BMS
